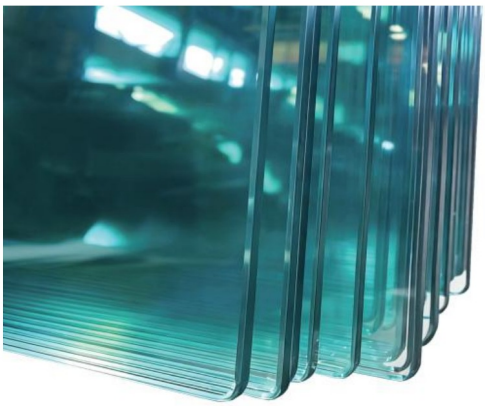
STEEL STRUCTURE

- Crafted from premium raw steel
  Hot-dip galvanized treatment with thick electrostatic powder spraying, ensuring long-lasting anti-corrosion and anti-rust properties
- Easily-mounted screw structure
- **Standard: EN1090-1:2009**

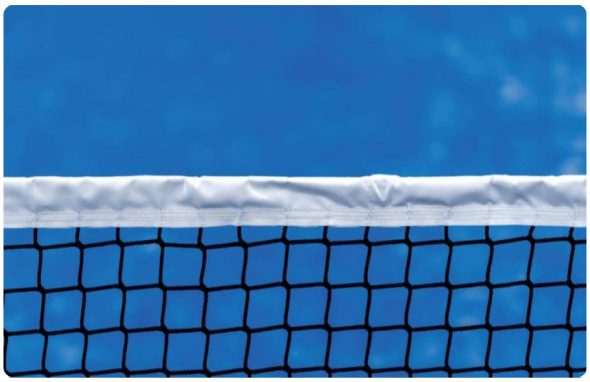


CE TEMPERED GLASS PANELS

- 12mm premium-quality heat-tempered glass
  Fine polished and rounded corners for safety
- **Standard: EN 12150**

WIRE MESH PANELS

- Electro-welded steel frame and Φ4mm mesh wire for steady structure
  100% powder coating electro-statically to prevent rusting and corrosion



NET

- 10m*1m anti-injury foldable net
- Polypropylene material for longer use life

LED FLOOD LIGHTS

- 200W 300 lux-illuminance for sufficient lighting at night
  IP66 water-proof class for outdoor courts
- **Standard: EN 12193:2018**

SYNTHETIC TURF SYSTEMS FOR PADEL COURTS

engineered for safer play, faster performance, and more enjoyable games.

PADEL PRO KDK 9000

Dtex: 9000 Pile Height: 12-15mm

- **Advanced KDK texturized yarn technology** ensures a smoother, more uniform playing surface for enhanced ball control and consistency.
- **Improved grip and traction** provide players with better stability enabling safer and more fast-paced play.
- **Enhanced durability and wear resistance** extend the turf's lifespan, maintaining performance even under intensive use.

PADEL PRO 7500

Dtex: 7500 Pile Height: 12-15mm

- **Cost-effective solution** without compromising on quality or performance.
- **Strong, resilient air-texturized yarns** ensure long-lasting durability and structural stability.
- **Optimized ball response and player comfort** for a smooth, enjoyable playing experience.
